# Problem Statement

While the e-commerce platform shows strong revenue growth and a positive average customer rating, there are disparities in performance across product categories, regions, and order statuses. The high average order value of cancelled orders suggests potential issues with order fulfillment or customer expectations. Additionally, the imbalance between the number of sellers and customers indicates a need for marketplace expansion and diversification.

# Objective

The primary objective is to capitalize on the platform's revenue growth while addressing key areas for improvement. This includes optimizing product category performance, enhancing order fulfillment processes, expanding the seller base, and leveraging regional insights to drive growth. The goal is to increase overall revenue, reduce cancellations, improve seller-to-customer ratio, and maintain high customer satisfaction across all regions and product categories.

# Secondary Insight

# Key findings

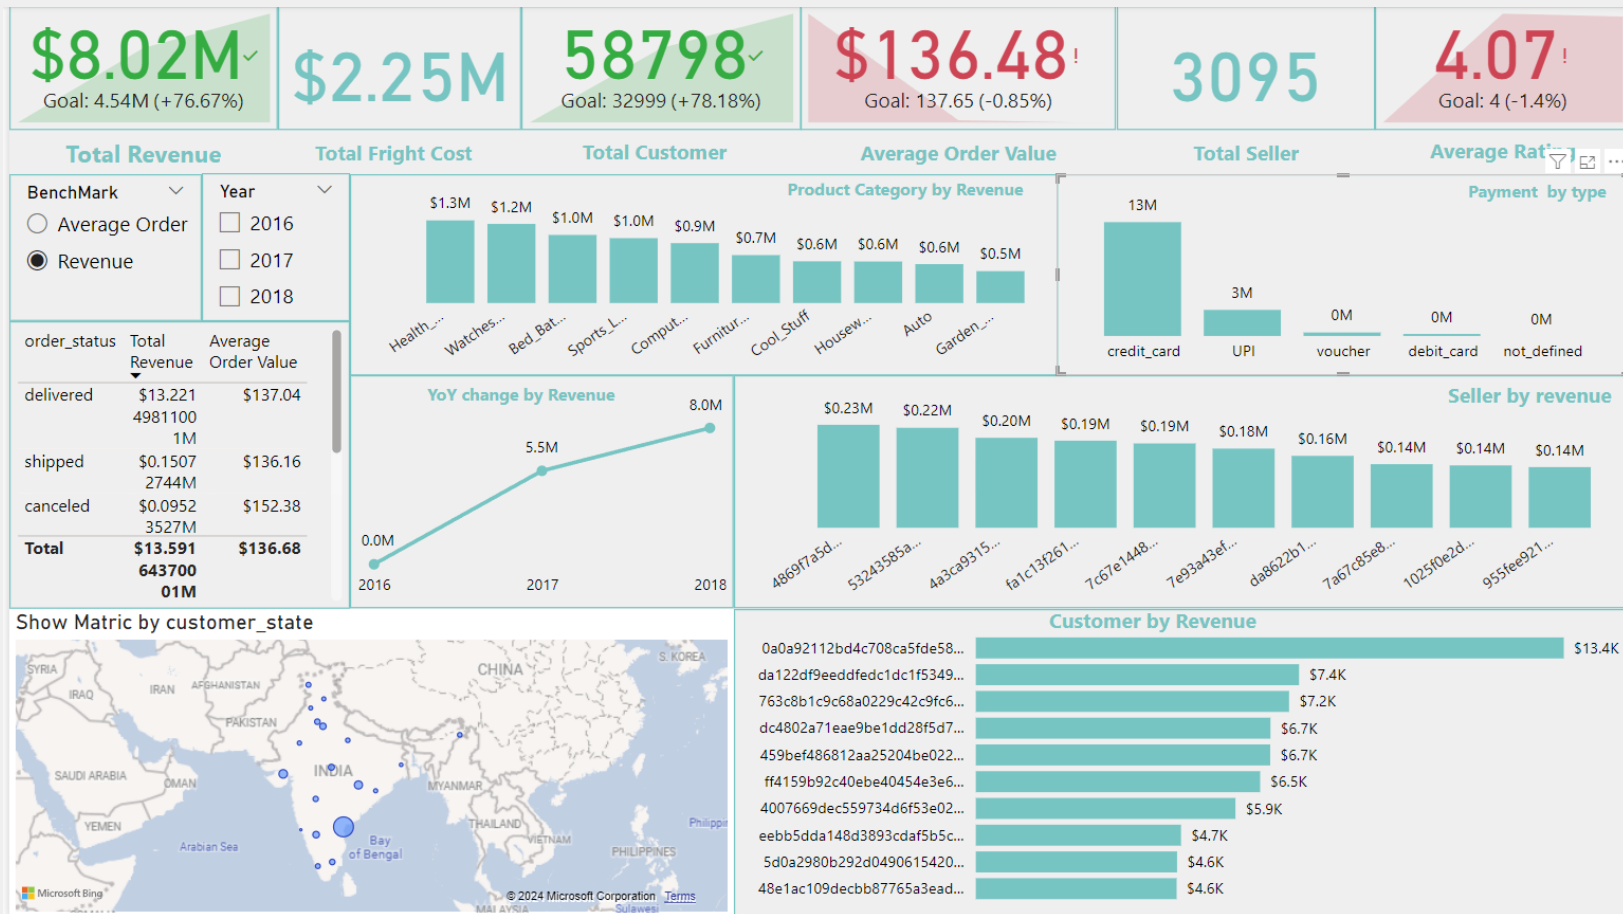

The primary insights reveal a total revenue of \$13.59M. Fright cost of \$2.25M. An average rating of 4.07% with \$136.48 per order. Total 3095 seller against 58798 customer.

Secondary insights highlight several areas of concern and opportunities for improvement:

1. Health beauty and watches generate highest revenue.
2. Most payment is done by credit card.
3. Revenue is increasing yearly.
4. Delivered products generate highest revenue but cancelled orders have highest average order value.
5. Rajasthan has highest average order Andhra Pradesh generates highest revenue.

# Recommendations

- Product Category Optimization: Focus on promoting and expanding the Health & Beauty and Watches categories, which generate the highest revenue. Analyze these categories' success factors and apply insights to boost performance in other categories.
- Payment Method Diversification: While credit card payments are dominant, explore and promote alternative payment methods to cater to a wider customer base and potentially reduce transaction costs.
- Order Fulfillment Improvement: Investigate the reasons behind the high average order value of cancelled orders. Implement strategies to reduce cancellations, such as improved inventory management, more accurate product descriptions, or enhanced customer communication.
- Leverage Rajasthan's high average order value by identifying and replicating successful practices in other regions.
- Analyze Andhra Pradesh's revenue-generating strategies and adapt them for other states to boost overall performance.
- Try to decrease freight cost and increase rating.
- Seasonal and Yearly Planning: Capitalize on the yearly revenue increase trend by implementing forward-looking strategies, such as seasonal promotions or annual growth targets for each product category.
- Develop strategies to increase the overall AOV Delivery Performance
